NYC REIC INVESTMENT CRITERIA

1. The property to be acquired is in New York City.
2. The programming proposed in the property supports culture, cooperation, and/or community benefit.
3. The programming in the property benefits populations that have traditionally had barriers to accessing stable places to do their work.
4. The property and programming proposal are financially sound so that we will be able to pay members back; we want to minimize the risks we are taking with our money and power.
5. The property acquired is restricted from being transferred as a market commodity in the future through legal mechanisms in their deeds (e.g. covenants, conservation easements, community land trusts); we can make this a prerequisite for working with us.
